

Ranjan Thapa Magar

SUMMARY

Electrical engineer with a bachelor's degree and master's studies in cybersecurity. Expertise in power system analysis, electrical design, and industrial electrification. Proficient in MATLAB, ETAP, and AutoCAD, with strong analytical and problem-solving skills. Seeking roles in power systems and renewable energy to aid Australia's energy transition.

EXPERIENCE

Santa Consultants Pvt. Ltd. - Electrical Engineer
Nepal • 03/2022 - 04/2023

- Designed and implemented electrical systems enhancing operational efficiency in commercial and industrial facilities.
- Conducted load calculations, electrical layout planning, and technical documentation.
- Coordinated with project teams to ensure safe, timely delivery of electrical installations meeting client specifications.
- Supported troubleshooting and optimisation of electrical systems, contributing to increased reliability and performance.

Nepal Electricity Authority - Engineering Intern
Nepal • 06/2015 - 10/2016

- Assisted engineers in power system planning and conducted distribution analysis to enhance system reliability.
- Supported fault diagnosis and performed electrical maintenance on distribution systems to ensure optimal performance.
- Assisted in designing electrical distribution systems for urban infrastructure projects.
- Conducted field inspections to ensure compliance with safety regulations and standards.
- Collaborated with engineers to analyze system performance and identify improvement areas.

Penshurst, NSW 2222

SKILLS

- Power modeling
- Grid analysis
- Load flow analysis
- Electrical distribution systems
- MATLAB and ETAP
- AutoCAD proficiency
- Project management
- Problem solving
- Team collaboration
- Technical writing

EDUCATION

**Master of Information Technology:
Cybersecurity**
**Crown Institute of Higher
Education**
Sydney • 11/2025

Bachelor of Electrical Engineering
**Pulchowk Campus, Institute of
Engineering - Tribhuvan University**
07/2022

WORK RIGHTS

Full-time work rights (Post-Study / Graduate Visa)

KEY ENGINEERING PROJECT

- Wide Area Measurement System (WAMS) - IEEE 14 Bus System, Developed and simulated a power system monitoring model using MATLAB. Analysed grid stability and system performance using synchrophasor data. Presented technical findings demonstrating improvements in power system reliability.
- **Electrical Building Services Design Project** - Designed a complete electrical system for a building including lighting, power distribution, load estimation, and protection coordination. Analysed energy efficiency and safety compliance to optimise building electrical performance.

WEBSITES, PORTFOLIOS, PROFILES

CERTIFICATIONS

- Engineers Australia Skills Assessment
- AutoCAD Certification
- PLC & SCADA Training
- Electrical Estimation & Design
- Transmission Line Design
- White Card - Construction Safety
- Australian Driver's License
